Supervisory Patent Examiner, Art Unit 2857								

Continuation of 11, does NOT place the application in condition for allowance because: 1. Continuation of 13, Other: applicant's argument that the limitation "a first database that contains data about the causes of malfunctions in a plurality of installations and improvement measurement data is not met by Okazaki (U.S. Patent 6,909,990)" is not quite right (see applicant after final argument page 12-3. Examiner would like to direct the applicant to Fig. 7. The Plant system includes "Plant Data Collecting and Processing Computer"; this system as noted in Fig. 6, for instance identifies the Plant Unit, the "Power Station Number" and database that contains data about causes of malfunctions in plurality of installations (plant units). The diagnosis computer 30 is composed of a single computer or a plurality of computers, in the latter case, the plural computers ... separately in charge of different functions, such as ... diagnosis and data storage (see Okazaki, column 6, lines 45-62). Further, as noted in Fig. 5, the computer system provides answers to the diagnosis data or improvement measure data. Therefore, Okazaki anticipates the limitation because it teaches all aspect of the instant claims. Applicant's arguments filed 2/8/2008 have been fully considered but they are not persuavieve.
